(54) Title: MIMO TRANSMITTER AND RECEIVER FOR LOW-SCATTERING ENVIRONMENTS

(57) Abstract: A transmitter (Tx1, Tx2) is arranged for simultaneously transmitting at least a first (s'_1) and a second (s'_2) signal. The first signal (s'_1) is modulated according to a first modulation constellation and the second signal (s'_2) is modulated according to a second modulation constellation. The transmitter is arranged to pre-code at least the first signal (s'_1) through a modification of the first modulation constellation so as to prevent a correlation between the at least first (s'_1) and second (s'_2) simultaneously transmitted signals.
